Important Ipad Information-- for Students Only

Due to a change in the global proxy filter, students, while at home or at other locations off the school network, must login to Lightspeed with their EACS username and password.

This will need to occur every 5 days, or each time a student uses a different IP address, meaning at home, at Starbucks, at McDonald's, or at other locations that use a different IP address.

When a student visits the Internet through Safari, a blue Lightspeed login window will pop up and the student will login with his/her EACS username and password. This login will allow the student to access all approved apps and Internet content.

Additional instructions for Ipad

This information only affects students, not staff:

In addition to the messages regarding the changes in the global proxy filter, students now have a blue Lightspeed rocket app on their iPads, which gives them a direct login to the Internet with their EACS username and password. So, please inform student to "tap on the Rocket and login" when wanting to use the Internet. Students should use this login prior to using any web-based app, such as Showbie or Canvas, or just using the Internet with Safari
